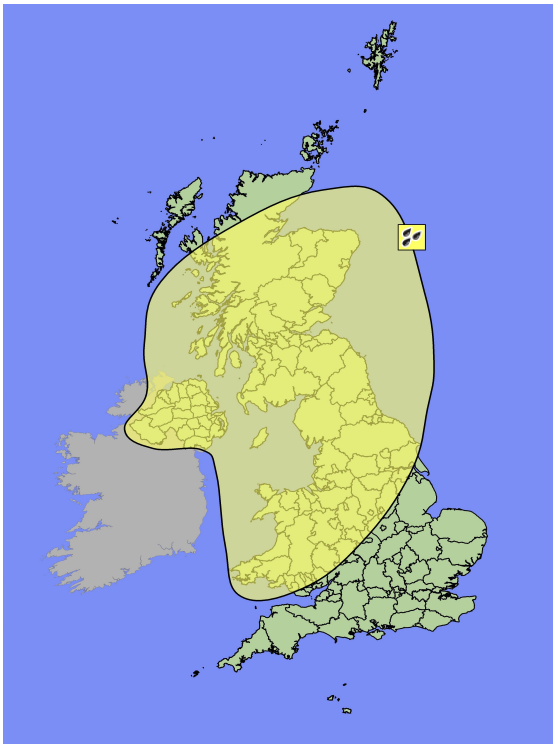
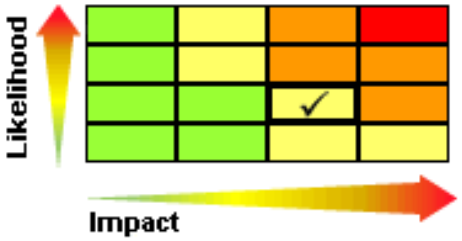
National Severe Weather Warning Service





Chief Forecasters Assessment
The area of low pressure is expected to move south again during the course of Tuesday, to be centred close to the south of Ireland later in the day. Very strong winds are likely at first across Scotland and parts of Northern Ireland with gusts of over 60 mph. A band of heavy rain will continue northwest across Scotland and Northern Ireland early in the day, whilst further bands of heavy and possibly thundery showers are likely to develop within the circulation of the low.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **00:00 on Tue, 25th Sep 2012** until **23:59 on Tue, 25th Sep 2012**

Further rain or showers, heavy and persistent in places, are likely during Tuesday. The rain will be accompanied by gales and possibly severe gales for a time across Scotland and Northern Ireland in particular.

The public should remain aware of the potential for further localised disruption due to heavy rain and/or the very strong winds.
